Dear All,

As you know, there are some services where access is granted to college/department coordinators. For example, probation list, class list,....etc.

DPS, as well, do grant access to these coordinators. As this is not in place in current implementation, we need to evaluate the required work/time to implement it.

Thanks and Regards,

Abdullah Al Rashdi

Dear Abdullah,
On a quick inspection my observation and impacts are mentioned below :
1) Code Level : SQL level changes (till now one change reported)
2) Configuration Level (Portal Level): A group need to be created (or any existing group need to be accommodate) to include mentioned users to have access.

Complexity : Low
Maintainability : Portal level, need to maintain manually

Time frame : Same Day.

Hope the above information helps.
Advise the needful.

with regards

Bhabesh

Dear Abdullah,

In DPS Thesis service, college Asst. Dean and HOD already have access to respective thesis records. I can extend the same to college and department coordinator.
If all college and department coordinators are acedmics then in DPS thesis authorization will be handled within the service without the need of portal role.
I will start working on it and update you accordingly.

Regards,
Afroz.
